

Specimen collections have never been so easy.

WEBTOXICOLOGY'S DRUG AND ALCOHOL COLLECTION MANAGEMENT SOLUTION.

Take control of your drug & alcohol tests.

WebToxicology's Collection Management system is the intelligent solution that accelerates data entry, donor scheduling and the test ordering process.

Engineered to support millions of drug and alcohol laboratory tests a year, WebToxicology's Collection Management service helps you administer everyday collection tasks and automate the result reporting process. By merging our drug test analysis expertise with market-leading technologies, we are confident our Collection Management system will offer you the most advanced solution available.

Eliminates the need to fill out forms by hand. When combined with result reporting, provides a powerful data management solution.

Member of the Alere group of companies.

Features & benefits

- » Decrease collection time and improve data accuracy
- » Eliminate handwritten laboratory test request forms
- » Intuitive step-by-step process ensures consistency in your drug testing program
- » Improve scheduling and communication between clients, collectors and donors
- » Track the location of shipped, pending or complete specimens
- » Accessible from any computer with high-speed internet access and a printer
- » No requirement for additional software installation

“Collections Management is very beneficial to our company. It allows all our agencies to perform collections on individuals from different locations with ease. It also streamlines this process online and substantially reduces the time to prepare the labels and paperwork which is normally completed by hand.”

–G. Paulis
Regional Manager,
Supervision & Treatment Solutions

How it works:

Easily schedule donors and enter/retrieve data.

CLIENT SCHEDULES DONOR AND PRE-ENTERS DONOR DATA

- 1 Administrator enters donor information, designates date, location and type of collection.

...OR COLLECTOR ENTERS DONOR DATA AT COLLECTION TIME

- 1 Donor presents for a scheduled or unscheduled specimen collection.
- 2 Collector enters donor information along with type of test.

Fast steps to collect, seal & package specimens.

COLLECT, PRINT FORMS & PREPARE SPECIMEN FOR TESTING

- 1 Collector performs the collection.
- 2 Collector prints the Custody and Control Form, generating labels for the specimen.
- 3 Collector seals the specimen with the labels from the Custody and Control Forms, then ships the specimen to laboratory for analysis.

Integrated lab test orders, tracking and reports.

LAB CONFIRMATION TESTING

- 1 Redwood receives specimen shipment and processes it for analysis.
- 2 Redwood analysis identifies the absence or presence of multiple drugs and/or drug metabolites.

Client receives conclusive test results via **WebToxicology**.
