- » Simple to use pipette and cassette
- » Results in 5 minutes
- » CLIA Waived and FDA 510(k) cleared to market.

How it works.

PRODUCT TRAINING AND CERTIFICATION AVAILABLE ONLINE.

PRODUCT PROCEDURE NOTE: Refer to product insert for complete instructions, limitations, and warnings.

This assay provides only a preliminary analytical test result. A more specific alternate chemical method must be used in order to obtain a confirmed analytical result. Gas chromatography/mass spectrometry (GC/MS) or liquid chromatography/tandem mass spectrometry (LC/MS/MS) are the preferred confirmatory methods. Clinical consideration and professional judgement should be applied to any drug of abuse test result, particularly when preliminary positive results are indicated.

1. Amphetamine (AMP), Cocaine Metabolites (COC), Marijuana (THC), Methamphetamine (M-AMP), Opiates (OPI) and Phencyclidine (PCP).

FOR PROFESSIONAL IN VITRO DIAGNOSTIC USE ONLY.
